

Getting started to install Asanti 2.0

This tutorial explains how to get started with the Asanti 2.0 installation.

WARNING: If you already have Asanti 1.0 installed then follow the "Getting started to upgrade Asanti 1.0 to 2.0" Tutorial.

1. Check your system to install Asanti 2.0

1. Download the PrepareForInstall tool ([click here](#)) on the computer which will become your Asanti Server.
2. Extract the PrepareForInstall tool by double clicking the 2.0.0_PrepareForInstall file (in the Downloads location).
3. Browse to any hard disk root drive location in the Self extracting archive dialog and click the "Extract" button.
4. Start the PrepareForInstall application from the extracted 2.0.0_PrepareForInstall folder.
5. Select the Asanti 2.0 product and click Next.
6. Fill out the registration form and click Next.
 - The application will run various tests to check whether you need to make any Operating System software adjustments before you can start the Asanti 2.0 installation.
 - A report will be generated which will inform you if changes need to be made.

2. The report indicates some issues

1. Make the required software adjustments.
 - Example: Install the Windows updates.
2. Restart the PrepareForInstall application.

NOTE:

Various other errors and or warnings can be given than what is illustrated here. Please contact Agfa service if you don't know how to make the required adjustments.

4. Download the Asanti 2.0.0 DVD

1. Select the hard disk on which you want to download the Asanti 2.0 DVD.
 2. Click the download button.
- The Asanti 2.0 DVD will be downloaded. The download time will depend on your internet connection bandwidth.
 - After download the DVD will extract automatically.

5. Start the Asanti 2.0 installer

1. When the Asanti 2.0 DVD has finished successfully you can start the installer by clicking the Install button.
 2. Follow the install instructions as mentioned in the "Asanti 2.0 Quick Installation Guide" which can be found on the DVD you have just downloaded:
Disk Drive:\Agfa_DVD\Asanti_2.0.0_DVD\documentation
- **WARNING:** Do not move or rename the Agfa_DVD folder or its contents!

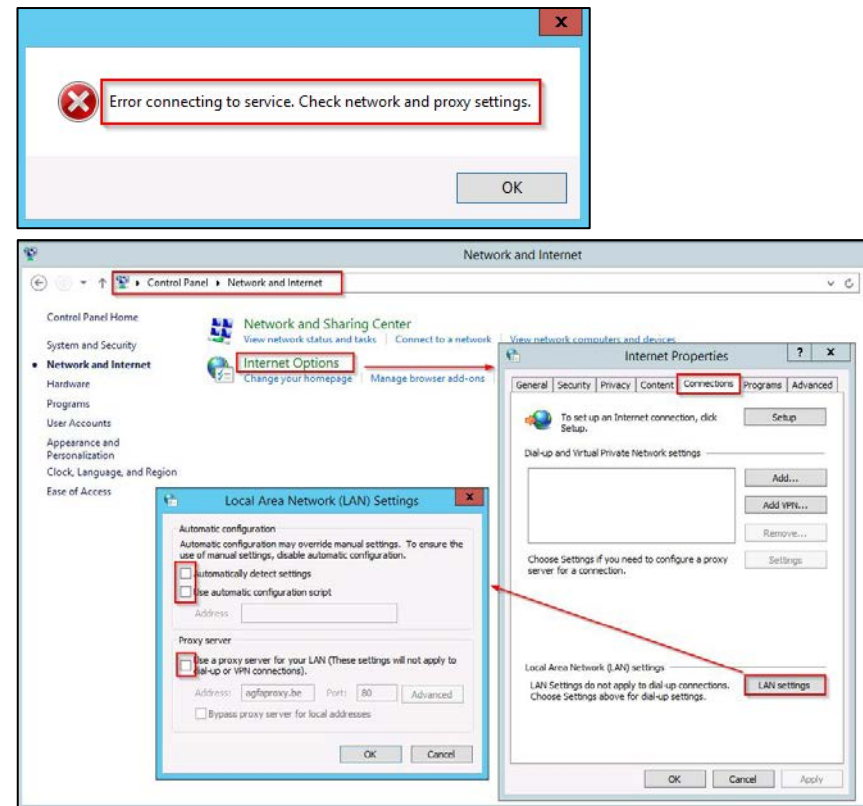

6. Troubleshooting

- PrepareForInstall generates an error: "Error connecting to service. Check network and proxy settings".

SOLUTION: PrepareForInstall does not support all Proxy Server types. Disable your Proxy Server configuration:

1. Open the Control Panel.
2. Open Network and Internet.
3. Open Internet Options.
4. Select the Connections tab.
5. Click on the LAN settings button.
6. Deselect all options within the LAN Settings dialog.
7. Click OK to close all dialogs.

Contact Agfa service when you cannot disable the proxy server.

Contact Agfa service for any other error that you cannot resolve.
